Ketiara Co-op farmers

Takengon, Aceh Tengah, Sumatra

Coffee has been grown in the Gayo Highlands of Sumatra since 1908 and is well known for its rich and complex flavor.

KOPEPI KETIARA is a women-led cooperative established in 2009 and in a short period of time they have built a reputation for producing high quality Fair Trade Organic certified coffee in the Central Aceh region. The co-op provides full service to its members including technical and management training, cupping classes, and quality control. With the premiums from Fair Trade USA, the co-op has invested in new processing plants and a coffee roaster to aid in quality evaluation. They use exclusively organic fertilizer and compost.
