Harvest: June - November

Wau coffee farmers

Eastern Papua New Guinea

Wau is a township renowned for being the first to plant coffee gardens in Papua New Guinea. Wau region is also recognized for its gold mining which began prior to its independence and still operates today within some of its precincts. ECOM (Monpi Exports, LTD) hosts 233 farmers in our SMS certified traceability program. This program is supported by a local mill, suitably called "Goldfield Coffee". This mill is dedicated to buying parchment exclusively from Wau certified smallholders. Under another ECOM (co-sponsored) community project, a clean water supply has been provided to Banisu Elementary School where many of the coffee suppliers children attend. The farms and coffee blocks are situated around the valley fringes and across the surrounding ridge which blend nicely with the natural flora and fauna rich in iron content. This coffee can be purchased as UTZ certified.
